VAL-MATIC MINIMIZING ENERGY CONSUMPTION WHITE PAPER

Do you know the most overlooked valve characteristic in water pumping systems? It's the valve's ability to minimize energy consumption. Valves play an important role in the operation of the piping system. Care in their selection and placement can greatly enhance the energy efficiency of the system. **Minimizing Energy Consumption Through Valve Selection** white paper will discuss the flow and operating characteristics of various check valves and pipeline valves and how they impact system performance, as well as the concept of placing and selecting air valves to prevent air binding. For additional information on Val-Matic Products and other white papers visit us at www.valmatic.com.

About Val-Matic

Val-Matic Valve and Manufacturing Corporation's headquarters is located in Elmhurst IL with additional manufacturing facilities in Addison, IL. Val-Matic is a leading manufacturer of Air Valves, Check Valves, and Quarter Turn Shut-Off Valves for water/wastewater, power, industrial, fire protection and HVAC applications.
