VAL-MATIC'S PROTECTIVE INTERIOR COATINGS WHITE PAPER

Did you know the valve industry adopted epoxy coatings starting in the 1970s? Manufacturers realized a corrosion resistant surface was critical in certain applications. The interior coating of the body serves as the mating sealing surface and must also resist abrasion and erosion for high localized fluid velocities. Since the 1990's, two types of epoxy coatings have been commonly specified and used for iron valves in the waterworks industry: fusion bonded epoxy (FBE) and liquid epoxy. To learn more about the typical requirements that apply to these coatings visit our technical papers page on our website at www.valmatic.com.

About Val-Matic

Val-Matic Valve and Manufacturing Corporation's headquarters is located in Elmhurst IL with additional manufacturing facilities in Addison, IL. Val-Matic is a leading manufacturer of Air Valves, Check Valves, and Quarter Turn Shut-Off Valves for water/wastewater, power, industrial, fire protection and HVAC applications.
