VAL-MATIC DUAL DISC® CHECK VALVES

Val-Matic designed its check valves utilizing criteria engineers deem important such as slamming characteristics, flow efficiency and headloss. A favorite check valve among engineers is Val-Matic's Dual Disc® Check Valve with its compact wafer design and low cost making it a popular choice when space and price are major factors in valve selection. The Dual Disc® Check Valve features non-slam spring-assisted closing, a pressure sensitive vulcanized seat that provides tight closure at both low and high pressures, and a lift and pivot disc action to reduce seat wear and extend seat life. The valve is NSF/ANSI 61 certified for drinking water, NSF/ANSI 372 certified Lead-Free and manufactured under a certified ISO 9001 quality system. For additional information on Val-Matic Dual Disc® Check Valves visit www.valmatic.com.
