## FOR IMMEDIATE RELEASE

June 19, 2018

### VAL-MATIC PLUG VALVES

Val-Matic's *Cam-Centric® Plug Valve* is an excellent choice when you have more than just water flowing through your system. The *Cam-Centric® Plug Valve* is the solution for systems when slurries, grit or solids are present. Its eccentric action allows the plug to rotate and lift out of its seated position minimizing rubbing or scraping. Features such as a heavy-duty fully rubber encapsulated plug, welded nickel seat, grit-seals and V-Type packing provide reliable operation. *Cam-Centric® Plug Valves* are built using advanced manufacturing technologies and are certified to rigorous industry standards to assure reliable performance. Fusion Bonded Epoxy, Rubber Lining or Glass Lining coatings are available when necessary. For additional information, contact Val-Matic or visit [www.valmatic.com](http://www.valmatic.com).
