VAL-MATIC'S QUADROSPHERE VIDEO

Are you curious how the QuadroSphere® Ball Valve works? Have you heard about the Ring Master® Seating System and want to know more? Val-Matic just released a video to explain all the ins and out of the trunnion ball valve and its seating system. Did you know the unique contoured full port ball adds 4 additional flow paths? The QuadroSphere® ball design allows debris to be flushed from the valve body instead of accumulating. The Ring Master® Seating System provides excellent shut-off and ease of operation in applications when sand, scale, powers and other solids are present in the media. If you would like more information on how this works check out the QuadroSphere® video on Val-Matic's YouTube page or website www.valmatic.com.
