## **VAL-MATIC COATING TEST**

Val-Matic is fortunate to have two water and wastewater treatment facilities located within a half mile of their plant that offer working environments for valve testing. At the Salt Creek Sanitary District Water and Waste Treatment Plant (SCSD WWTP) in Villa Park, IL, Val-Matic engineers had the opportunity for a trial installation of four wastewater combination air valves to compare multiple valve interior coatings. The objective was to determine which coating provided the most protection against harmful build-up and deposits in a wastewater application. Visit [www.valmatic.com](http://www.valmatic.com) to read the full article and find out the results.
