VAL-MATIC VALVES FOR WATER AND WASTEWATER

Val-Matic Valve & Mfg. Corp. offers a wide range of products for the water and wastewater industries. Quarter-Turn Valves have flow path geometries that are optimized to provide exceptional flow control characteristics, ultra-low headloss and energy conservation. Clean Water Air Valves are NSF/ANSI 61 Certified for use in drinking water systems. Wastewater Air Valves are designed with a 2" clean out connection to facilitate the passage of solids. Val-Matic Check Valves are suitable for potable water to abrasive slurries and corrosive chemicals with a wide range of metallurgies, seating materials and accessories available. VaultSafe® Products are designed to protect potable water systems from contaminated flood waters, freezing temperatures and intentional malicious contamination. For more information regarding the Val-Matic® Product Line, visit www.valmatic.com.
