VAL-MATIC BUTTERFLY VALVES

Val-Matic's American-BFV® Butterfly Valve is strong, reliable and proven dependable since 1971 with thousands of field installations in municipal, industrial and power applications throughout the world. Features include standard epoxy interior, continuous uninterrupted seating and Tri-Loc™ seat retention system, which allows for field adjustment/replacement without the need for special tools or epoxies. The valve's disc is constructed of ductile iron for added strength and improved headloss characteristics. Don't forget about Val-Matic's High Performance Butterfly Valve with a pressure rating up to 300 psi and features ductile iron construction, a 17-4 stainless steel shaft and double offset design. For more information on Val-Matic's American-BFV® Butterfly Valve visit www.valmatic.com.
