VAL-MATIC AMERICAN-BFV[®] BUTTERFLY VALVES

Thousands of field installations throughout the world have demonstrated the strong, reliable, and proven dependability of the Val-Matic American-BFV[®] Butterfly Valve. Features such as standard epoxy interior, continuous uninterrupted seating, and the Tri-Loc[™] seat retention system allows for field adjustment/replacement without the need for special tools or epoxies. The valve's disc is constructed of ductile iron for improved headloss characteristics and added strength. Additional features include self-adjusting/wear resistant V-Type packing shaft seals and stainless steel tangential taper pins designed to provide strength and rigidity. A variety of actuation options are also available. Don't forget about Val-Matic's High Performance Butterfly Valve with a pressure rating up to 300 psi and features ductile iron construction, a 17-4 stainless steel shaft and double offset design. For additional information on our products, contact Val-Matic or visit www.valmatic.com.
