VAL-MATIC DUAL DISC CHECK VALVES

Val-Matic's Dual Disc[®] Check Valve with its compact wafer design and low cost have made it a popular choice when space and price are the major factors in valve selection. The Dual Disc[®] Check Valve features non-slam spring-assisted closing, a pressure sensitive vulcanized seat that provides tight closure at both low and high pressures, and a lift and pivot disc action to reduce seat wear and extend seat life. The Dual Disc[®] Check Valve is available in sizes 2"–60" for pressure ranges up to 500 PSI. They are available in Wafer (ANSI 125, ISO PN10, ISO PN16), Lug and Grooved End connections.

The Dual Disc[®] Check Valve is UL approved for Fire Protection in sizes 2½"–12" and FM approved in sizes 2½"–16". The Dual Disc[®] Check Valve complies with AWWA C518 and is NSF/ANSI 61 certified for drinking water, NSF/ANSI 372 certified Lead-Free and manufactured under a certified ISO 9001 quality system. For additional information on Val-Matic Dual Disc[®] Check Valves visit www.valmatic.com.
