GEOHERMAL POWER ARTICLE

Geothermal energy generation is a growing renewable resource that presents challenges for equipment suppliers in controlling the often-harsh geothermal fluids. Val-Matic's QuadroSphere® trunnion ball valves offer unique features that make them an excellent choice for geothermal brine fluids. By incorporating the advanced design features of the QuadroSphere® trunnion ball valves, several geothermal facilities have gained improved valve performance and overall system reliability, while reducing maintenance frequency. For additional information on this article Geothermal Power – New Ball Valve Technology Pays Dividends, visit Val-Matic's website www.valmatic.com.
