VAL-MATIC SWING-FLEX®/SURGEBUSTER® CHECK VALVES

Val-Matic's Swing-Flex® and Surgebuster® Check Valves are designed for many years of maintenance free service. Non-clog design and a short 35° stroke provides fast closure to minimize slamming and slam related surges. Constructed of ductile iron with cold working pressures up to 250 psi making them ideal for systems where traditional 125 lb. valves were unsuitable and for those where surges may be a concern. The Surgebuster® also has a Disc Accelerator which is a precision formed stainless steel mechanism that closes the valve disc rapidly thus avoiding slamming by flow reversal and yet allowing the disc to be stabilized under flow conditions. Both valves are NSF/ANSI 372 Certified Lead-Free, NSF/ANSI 61 Certified for Drinking Water and are designed and manufactured to AWWA C508. For additional information on Swing-Flex® and Surgebuster® Check Valves visit www.valmatic.com.

About Val-Matic

Val-Matic Valve and Manufacturing Corporation's headquarters is located in Elmhurst IL with additional manufacturing facilities in Addison, IL. Val-Matic is a leading manufacturer of Air Valves, Check Valves, and Quarter Turn Shut-Off Valves for water/wastewater, power, industrial, fire protection and HVAC applications.
