VAL-MATIC SLAM! VIDEO

Do you know How to Stop the Ground from Shaking? Check out Val-Matic's Slam! video on their YouTube page to find out. The dynamic test in the video demonstrates that the Val-Matic Surgebuster® Check Valve closes faster than a conventional air cushion swing check valve which reduces check valve slam up to 80%. The Val-Matic Surgebuster® features the patented Disc Accelerator that closes the valve disc rapidly avoiding slamming by flow reversal. The Surgebuster® also features drop tight seating and a 35° short disc stroke to help reduce the closing time of the valve minimizing flow reversal and the resultant water hammer normally associated with the sudden stoppage of reverse flow. Visit www.valmatic.com to view all their videos or check them out on Val-Matic's YouTube page.
