VAL-MATIC VAULTSAFE® PRODUCTS

Contaminated flood waters, freezing temperatures and intentional harmful contamination, OH MY! Protect your potable water system with Val-Matic's VaultSafe® Family of Products and put your mind at ease. The VaultSafe® Family consists of the FloodSafe® Inflow Preventer, the FrostSafe® air damper and the VentSafe® vent pipe security cage. The FloodSafe® prevents contaminated water from passing through it thus preventing it from entering the air valve outlet and compromising the potable water system with its dual chambers and float checks. The FrostSafe® minimizes the thermal exchange of cold and warm air in and out of a vault to help prevent freezing with a bi-directional hingeless disc and wafer design. The VentSafe® safe guards vent pipes against the hazards of nesting animals and intentional harmful activities because of its hemispherical screened security cage. More information on the VaultSafe® Family of Products is available at www.valmatic.com.

About Val-Matic

Val-Matic Valve and Manufacturing Corporation's headquarters is located in Elmhurst IL with additional manufacturing facilities in Addison, IL. Val-Matic is a leading manufacturer of Air Valves, Check Valves, and Quarter Turn Shut-Off Valves for water/wastewater, power, industrial, fire protection and HVAC applications.
