VAL-MATIC VALVES IN WATER DISTRIBUTION

Val-Matic is a trusted name in water distribution with quality products certified to NSF/ANSI 61 for Drinking Water. Water distribution systems contain an interconnected series of pipes, storage facilities and components such as valves for cities, homes, schools, hospitals, businesses, industries and other facilities. Public water systems depend on these distribution systems to provide an uninterrupted supply of pressurized safe drinking water to consumers. Val-Matic's Quarter-Turn, Air and Check Valves are used in every aspect along the almost one million miles of distribution systems across the United States. Val-Matic valves are designed for long life and trouble-free performance, making them key components in water distribution systems. For additional information on our products, contact Val-Matic or visit www.valmatic.com.
