LIQUID EPOXY COATING Devoe Bar-Rust 233H

General Description:

Liquid Epoxy is a two-part, low VOC, chemically cured, semigloss coating that is applied as a liquid to the sandblasted surface of a valve and then allowed to cure at room temperature. The result is a durable coating with exceptional abrasion and chemical resistance ideally suited for valves in water and wastewater applications.

Advantages of Epoxy:

- 1. The coating is applied in accordance with AWWA Standard C550 "Protective Interior Coatings for Valves and Hydrants" and certified to the requirements of ANSI/ NSF Standard 61 - "Drinking Water System Components - Health Effects" for coating valves and fittings.
- 2. Epoxy coatings are applied in a spray process in one or multiple-coats.
- 3. The spray process provides a smooth, even coating thickness with no runs, sags, or thin spots common when applying liquid paints.
- 4. Epoxy has a long-term performance history in water and sewage environments including salt water, slurries, methane and hydrogen sulfide exposure.

Application Process:

- 1. The valve is cleaned and sandblasted, prior to coating.
- 2. Epoxy is applied in a semi-automated manufacturing process in accordance with the coating manufacturers' procedures and industry standards to assure consistency and high quality.
- 3. The epoxy is allowed to cure at room temperature.
- 4. The final surface is visually and electrically (when specified) tested to verify thickness and that it is holiday free.

Typical Performance Characteristics:

1. Color:	Black	
2. Thickness:	4-6 mils	1 Coat
3. Impact Resistance:	20 in-lb	ASTM D2794
4. Moisture Permeability:	.07	ASTM E96
5. VOC:	1.41 lbs/gal	EPA 24
6. Service Temperature:	160° F. (250° F.)	Wet (Dry)
7. Adhesion:	Excellent	ASTM D4541
8. Abrasion:	Excellent	ASTM D4060

9. Elongation: Excellent ASTM D522 Method B

10. Water Immersion: Excellent **ASTM D1308**

11. Chemical Resistance to: Alkalis, salts, oils, greases,

> foodstuffs, 50% sodium hydroxide, 28% ammonia, 25% citric acid,

5% sodium chloride,

10% ammonium hydroxide, sewage.
